Gaza International Foundation for Peace on Earth
Director of International Program of National Research Center**

Dear Dr. El-Harazin,

I am very happy to read your proposal concerned with Global University System (GUS)/Palestine/Gaza Strip and West Bank. This project is considered to be one of the top priority required projects for the Palestinians community and education. Such kind of project shall ultimately play a main role in fostering the Palestinian Economy in various ways. One, is offering jobs for many unemployed qualified engineers and IT specialist. Second, is the direct impact on education and administration in Palestine.

I strongly encourage the GUS project

Thanking you,

Sincerely yours,

Nabil
